

JA-66C Integrated Hi-Fi Amplifier

Recognising that people's requirements cover a broad spectrum, we tailor our products to meet individual needs. With the same design of the JA-88C, the JA-66C is the most affordable JungSon Hi-Fi amplifier, without compromising on sonic performance and craftsmanship of JungSon products.

Features

- 80W class A & B per channel at 8 ohms
- A balanced (XLR) input and 2 non-balanced (RCA) inputs
- High quality of audio components: Toshiba's semiconductors, Rubycon (Japan) capacitors, Motorola (US) microchips and JungSon's patented square transfer
- JungSon gold coated input and output terminals
- JungSon unique designed exterior package (patent pending)

Specifications

- **Power:** 80W per channel (Class A&B, RMS 8 Ω)
- **THD:** $\leq 0.1\%$ (1 kHz/1W)
- **S/N ratio:** ≥ 90 dB
- **Frequency response:** 20 Hz -20 kHz (± 0.5 dB)
- **Input impedance:** 100k Ω
- **Output impedance:** 4-8 Ω
- **Voltage:** 220~240 ± 10 %
- **Size (LxWxH):** 430x370x125 mm
- **Weight:** 10 kg
