

JA - 88E Stereo Power Amplifier

Recognising that people's requirements cover a broad spectrum, we tailor our products to meet individual needs. The JA-88E is a multiple award winner, particularly bestowing China's prestigious 'Experts Agree Award', and offering JungSon's comprehensive knowledge of the best Hi-Fi amplifiers and selections of the best audio components available.

Features:

- 80W class A & B per channel at 8 ohms
- A fully balanced (XLR) input and 2 non-balanced (RCA) inputs
- JungSon's unique designed exterior package
- Japanese made semiconductors (Toshiba) and capacitors (Rubycon)
- JungSon's patented square transfer
- American Jeff Roland's digital volume control technology
- Nature hard wood remote control

Specifications:

- **Power:** 80W per channel (Class A&B, RMS 8 Ω)
- **THD:** $\leq 0.08\%$ (1 kHz/1W)
- **S/N ratio:** ≥ 90 dB
- **Frequency response:** 20 Hz -20 kHz (± 0.5 dB)
- **Input impedance:** 100k Ω
- **Output impedance:** 4-8 Ω
- **Voltage:** 220~240 ± 10 %
- **Size (LxWxH):** 430x380x125 mm;
- **Weight:** 11.5 kg
